IL CATALOGO DELLE RISORSE ON LINE EBSCO ATOZ

Dalla pagina delle risorse on line di BIBLIOSAN (<u>www.bibliosan.it</u>), clicchiamo su <u>Il Catalogo Bibliosan online delle risorse elettroniche EBSCO: AtoZ</u> Ci apparirà questa schermata:

Clicchiamo dove indica la freccia: **il catalogo Bibliosan delle risorse elettroniche Ebsco: AtoZ.** Ora vedremo la schermata di interrogazione del catalogo *EBSCO AtoZ*, da cui partire per la nostre í necessità informative!

Un momento:

N.B.: ricordiamo che il catalogo *EBSCO AtoZ* raggruppa e <u>fotografa il posseduto dei periodici</u> <u>nel solo formato elettronico esclusivamente delle Biblioteche della rete BIBLIOSAN</u>.

Il catalogo ACNP indica <u>il posseduto in formato cartaceo e in formato elettronico, di tutte</u> <u>le Biblioteche datalia, per qualsiasi disciplina</u>. Consentono di localizzare il periodico nelle varie Biblioteche e di fare richiesta per ottenere la pricolo completo;

il catalogo EBSCO AtoZ: è il catalogo dei <u>periodici in solo formato elettronico posseduti</u> <u>dalle Biblioteche di BIBLIOSAN</u> e riguardano <u>specificatamente logimbito biomedico</u> e scientifico-tecnico (STM); possono far collegare direttamente al periodico che ci interessa e allogiticolo completo; altrimenti, rimanda al link di NILDE per fare richiesta;

il catalogo di un solo editore, come per es. Elsevier, Sciencedirect, è la raccolta di <u>tutti i periodici solo di quellorditore, solo elettronici</u>, dove sono accessibili e liberamente consultabili e scaricabili solo quelli in abbonamento da tutte le Biblioteche di Bibliosan, in <u>ambito biomedico e scientifico-tecnico</u> (STM); per i periodici che non sono in abbonamento, in genere è possibile consultare il TOC (table of contens) e logabstract, il full text va richiesto alla nostra Biblioteca o tramite NILDE.

Ecco la maschera di interrogazione. Come possiamo trovare il periodico che ci interessa? Se conosciamo il titolo esatto, digitiamolo nello spazio:

1. Nello spazio indicato dalla freccia, inserire il titolo della rivista che vogliamo cercare:

Se non siamo certi del titolo, possiamo rintracciarlo per ordine alfabetico. Sotto lo spazio, ci sono raggruppate le lettere e le sillabe.

Oppure possiamo selezionare:

1. all titles 2. journals only 3. books only

Nella schermata compaiono diversi titoli, possiamo semplicemente scorrerli e così individuiamo quello che ci interessa.

Da qui raccogliamo tutte le informazioni:

Quali informazioni otteniamo?

Intanto, analizziamo tutta la sezione a sinistra sotto il titolo evidenziato in rosso. Qui otteniamo lødentificazione certa del periodico e sappiamo di cosa possiamo disporre.

Osserviamo l\u00e9nformazione sul posseduto:

per es.:

MEDLINE Complete 2007 to present (Embargo: 1 year) significa che possiamo accedere al periodico dal 2007 ad oggi; per løanno corrente però non è possibile accedere.

Embargo significa che læditore non mette a disposizione on line il testo completo degli articoli. **N.B. læmbargo è una disposizione discrezionale dellæditore, che la può applicare per motivi** economici, a seconda della sua politica commerciale. Alcuni editori possono applicarlo per un mese, per 4, 6 o un anno.

Analizziamo insieme:

Si indica che tipo di risorsa è (resource type), il codice univoco, løeditore, il soggetto, infatti, vediamo insieme:

Resource Type: Journal (tipo di risorsa=periodico specialistico) ISSN: 0165-7380 Online ISSN: 1573-7446 (sono due ISSN diversi per due formati diversi) Publisher: Springer Science+Business Media B.V. (editore) Subject: Sciences -- Animal Welfare -- Veterinary Medicine (soggetto, argomento)

Il numero di **ISSN**, significa **International Standard Serial Number** ed è il numero internazionale che identifica i periodici, come quotidiani o riviste, a stampa o elettronici, in modo univoco e permette di standardizzare le classificazioni, ad esempio, nelle biblioteche. L'ISSN si differenzia dall'<u>ISBN</u> (International Standard Book Number) dei libri ed è attribuito da specifici organismi. LøISSN ci conferma se si tratta del nostro periodico in modo inequivocabile, infatti è un codice univoco.

Se vogliamo scoprire quali periodici abbiamo nella medicina veterinaria, per esempio, mettiamo la preferenza su **subject** e inseriamo õveterinary medicineö nel campo cerca: **questo è il risultato:**

oppure possiamo fare UN ALTRO PERCORSO:

dalla barra degli strumenti in alto, andiamo su õARGOMENTIÖ e poi dal menù a tendina, (select a subject), scegliamo la disciplina che ci interessa, dunque, õsciencesö.

tra le riviste sotto õsciencesö (3840) compariranno quelle sotto õveterinary medicineö e sotto õ*animal welfare*ö:

se, per esempio, clicchiamo su õveterinary medicineö (143 periodici), otteniamo la seguente schermata, con løelenco completo di tutti i periodici di questa disciplina, elencati in ordine

alfabetico, su tre pagine, possiamo scorrerli, oppure selezionarli già dal menù a tendina.. come ci resta più agevoleí

Ancora un altro percorso:

Se volessimo partire dagli **editori**, e sapere, per esempio, quali riviste abbiamo della ASM (American Society of Microbiology), andiamo dalla barra degli strumenti, in alto, su **õelenco collezioniö**, comparirà lælenco degli editori presenti nella rete BIBLIOSAN, scorriamo læditore che ci interessa e clicchiamo sull*a* cona dellælenco titoli (title list).
